

2ADB GoldStar **To those who think Astrology doesn't work**

1. In May of 2001, I called noted Astrologer Arlene Kramer and asked her to "witness" my forecast results for the Solar Eclipse coming up on June 21, 2001.

2. The 6/21/01 Solar Eclipse was to occur at 00 Degrees Cancer 10' at the "World Axis" and therefore could be of great significance.

3. There had not been a Solar Eclipse at 00 Degrees Cancer at least as far back, as 1700 A.D. In 1732 and 1713 there had been Solar Eclipses at 01 Degrees of Cancer. There will be a Solar Eclipse in 2020 A.D. and another in 2039 A.D.

4. There were three Lunar eclipses at 00 Cancer in 1703, 1722 and 1741 (all A.D.), but not a Solar eclipse.

5. For the Solar Eclipse of 6-21-2001, there were Four Factors of immediate concern:

A. The Solar Eclipse itself was on the World Axis (the Aries Point signifies: "The World at Large" .

A Solar Eclipse on the World Axis means an "Event Affecting the Whole World."

B. Venus & Saturn were both on the World Axis and formed a Midpoint to the Eclipse:

Venus and Saturn on the World Axis, Octile and Semi-Octile means "the departure of Peace & Prosperity".

C. Mars and Hades had formed an orbless Opposition aspect at 20 Gemini 15' and 20 Sagittarius 15'...or...20 Degrees 15' of Mutable or 80 Degrees 15' on the 90 Degree Dial:

Mars-Hades on the World Axis means, "sudden attacks, murder, atrocities".

D. Pluto On the World Axis:

Pluto indicates a Revolution or a Revolutionary Change, Revolutionary Changes, or Transformation.

6. The above had been noticed by me while examining the upcoming Solar Eclipse on the 90 Degree Dial. To get more detail, I then examined the chart of the 6/21/01 Solar Eclipse from the perspective of Mundane methods and decanate meanings and reported both the above and the following results to Arlene Kramer:

A. ***The Chart Ruler*** was Mercury (Virgo Ascendant) in the decanate of: "terrorists, suicide bombers, ruthless people. Fanatic actions taken against a "gate, tower, towering structure, city, port or bridge".

B. ***The Eclipse Ruler*** and decanate Ruler were both the Moon (conjunct the North Node) in the mundane decanate giving: "A Plot involving an alliance, group, country or cartel".

C. ***The South Node*** indicating a previously existing situation or event showed a decanate Meaning indicating: Intel (special news/information) of, therefore a previously existing situation or event.

D. ***Final Dispositers***: Mercury: Ruthless people. A race of ruthless men. Terrorists. Suicide bombers. Fanatic actions against a gate, tower, towering structure, port, city, or bridge.....and...Uranus: An Issue of Preparedness. Troublemakers are rounded up.

E. ***The Ascendant*** of the Eclipse Chart has decanate meaning of: " A location that suffers times of adversity". "A place of tribulation". "Afflictions and persecutions at the hands of fate".

7. ***Mars-Hades*** equaled the Washington, D.C. Natal Midheaven by semi-octile, so I thought Washington, D.C. would be one of the areas affected.

8. ***Venus and Saturn*** (in the Eclipse chart & on the World Axis) formed a midpoint to the Natal Midheaven of New York City.....and.....the Midheaven of the Eclipse Chart equaled the Natal Midheaven of New York City, so I felt that NYC would be another location affected.

9. In the Solar Eclipse chart, ***Mars*** (by Right Ascension), arrives (manifests) on the "world axis" (world stage) in 80.8 days. From the 6/21/01 Solar Eclipse at GMT: 11:59, 80.8 days occurs on September 11th at GMT: 07:13. Roughly 5 and 1/2 hours before the attack; EDT.

10. On my calendar, I marked a one-week window from Sept. 9th through Sept 16th to cover errors I might have made for the time when Mars-Hades would hit Washington, D.C. and New York City, and; I also recounted these dates to Arlene Kramer.

11. I told Arlene that my interpretation of the 6/21/2001 Solar Eclipse was that it was going to be a terrorist attack and that Washington, D.C. and New York City were the probable locations or the main locations.

Arlene said that it had been of much concern to her that "the Eclipse fell on an Ingress". I told her I had better check the Lunar Eclipse coming up for July 5th, 2001. I did so and found the following and called Arlene back with the following results:

The Lunar Eclipse chart for July 05, 2001 yielded a similar story.

Of immediate note was the **Midheaven** of the Lunar Eclipse chart at 27 Leo 45' equaling (by orbless semi-octile) the Mars-Hades orbless opposition already found in the 6/21/01 Solar Eclipse Chart.

The chart ruler was Jupiter in the decanate of "fanatic actions of suicide bombers or terrorists".

The Eclipse ruler was Saturn in the decanate of, "needing to get to the truth of a matter", and,

The Eclipse decanate ruler was Venus in the decanate of, "To fall from the sky in flames, an air crash".

The Midheaven gave: Jealousy, an attack on human association or companionship; and,

The Ascendant : A people stuck in the past. A society that attempts to hold onto their customs, styles and way of life.

The Final Dispositers are Mercury, in the same decanate and conjunct the chart ruler Jupiter (see above) and Uranus, still in the decanate dealing with preparedness as an issue.

The Moon itself in the decanate of people needing rescue.

12. **The Lunar Eclipse chart of July 05, 2001** also contained other planetary aspects and midpoints on the world axis, some of which are listed below:

A. Mars/Saturn = Pluto: The Death of many people.

B. Pluto/Node with Saturn/Uranus and the Ascendant:

Mourning and bereavement, a common and tragic destiny shared with many people, a fated destiny shared by many. A sudden and unexpected separation of others from the world. A sudden turn of destiny.

On a Personal Note: In the interests of brevity, I have only listed the most essential excerpts from the two eclipse charts:

1. For example, one of the locations given for a possible event was 73 West 58'. NYC is at 73 West 59'.

2. I mainly wanted those "budding astrologers" out there to know that the system of Astrology does work. When we humans are brought into it, mistakes are often made and it is we, the Astrologers who make them.

3. There is an old saying that the equestrians among you will recognize:

"Your horse never throws you, it is you that fall off the horse". It has been my experience so far that it isn't Astrology that tends to miss things.....when we miss something or don't get it right....it isn't "what Astrology missed"it is what we missed!

4. Another thing though is also true. Often, as Astrologers, unless we are checking the charts to begin with, we don't know what we are missing and doing all those charts is a lot of work; at least doing them right is. Not printing them out...taking the time to interpret them. So I am sure a lot of Astrologers just didn't have the time to check the Eclipse Charts, or perhaps weren't inclined to really look into what they might mean. I am involved in research, so I tend to "do a lot of delving". But a lot of the time, unless a client has asked me to look at a particular date or event....I miss a lot too.

For Example: Back in the August before the Gulf War, a soldier asked me to look and see if there would be a war.

I said yes, there would be one, and it would start on the upcoming Jan 16th. But if the soldier (an officer who might have had to go to Iraq) hadn't asked me, I wouldn't have looked.

5. ***So, to my fellow Astrologers out there,*** I say please give some incentive to those who have yet to discover what you already know, that the System of Astrology really does work.

When ***you*** get it right, record it, tell others (I told more people than only Arlene) ahead of time and then share what you got right with those who need to know.

We are all students of Astrology and we are all still learning.
